#NEVERHERE™

ACTIVE SHOOTER PREVENTION PROJECT, LLC

Technology Planning & Consulting

Technology planning and consulting for active shooter–resistant environments.

Active Shooter Prevention Project, LLC provides independent technology planning and consulting services that help organizations design, evaluate, and deploy the spatial, detection, and response technologies that make a location measurably more prevention-ready. Every engagement is delivered under the **#NEVERHERE™** brand and aligned to the P.R.O. Model™ framework.

SERVICES

Indoor Mapping & Spatial Intelligence

Planning and consulting for indoor mapping, geospatial data, and digital twin deployment — turning facility space into actionable intelligence for safety and operations.

Security Technology Advisory

Independent, vendor-neutral consulting on detection, sensor, access, and response technologies — specification, evaluation, and integration planning aligned to real-world threat scenarios.

Prevention Technology Planning

P.R.O. Model™–aligned technology roadmaps that translate prevention strategy into a sequenced, fundable, and measurable technology program.

Digital Twin Platform Consulting

Consulting on digital twin and spatial-intelligence platform selection, architecture, and lifecycle — from first deployment through enterprise-scale operations.

All technology planning and consulting services are offered and rendered under the mark **#NEVERHERE™** by Active Shooter Prevention Project, LLC.
