SAFEWARE®

INNOVATIVE SOLUTIONS | WHEN YOU NEED THEM

ABOUT
SAFEWARE, INC.

Safeware is a nationally recognized leader in safety and security solutions, specializing in the assessment, distribution, and training of advanced technologies to mitigate risks and enhance safety across various industries. From first responders and educational institutions to federal and municipal services, Safeware empowers organizations to protect lives, assets, and the environment with industry-leading solutions. With a strong commitment to quality, customer satisfaction, and safety excellence, Safeware simplifies the procurement process as a strategic sourcing partner with multiple national, state, and local contracts. Whether before, during, or after emergencies, Safeware provides the solutions you need when it matters most.

WE WERE THERE

For over 40 years, Safeware has helped educational institutions create safer learning environments with trusted safety, security, and emergency preparedness solutions. We proudly support K-12 schools, colleges, and universities with the equipment and expertise needed to prepare for everyday operations and critical incidents.

We understand that for school administrators, campus safety teams, and facilities professionals, planning and reliability are essential. That's why we provide comprehensive solutions for campus security, emergency response, facility protection, communications, and life safety. Backed by a team that includes former public safety professionals, we understand the challenges of protecting students, staff, and visitors and are committed to delivering dependable solutions you can trust.

If you don't see what you're looking for, contact us with your requirements and discover why Safeware is a trusted partner for educational safety and security solutions.

OPENGATE

The CEIA OPENGATE Weapons Detection System is a portable dual-pillar scanner that detects metallic threats without requiring bag removal. It offers high throughput, low false alarms, and real-time acoustic and visual alerts with mobile app control.

- Bag-free weapons screening
- Detects small to high-caliber firearms
- High throughput, minimal false alarms
- Portable, quick setup
- Indoor/outdoor use
- Acoustic/visual alerts, app configurable

Opengate ..... Call for Part Numbers

PD140E

The CEIA PD140E is a compact, handheld metal detector with NIJ 0602.02-compliant screening, uniform target detection, adjustable sensitivity, programmable alarms, long battery life, and ergonomic design for indoor/outdoor use.

- Uniform detection of magnetic/non-magnetic targets
- Adjustable sensitivity with optical, acoustic, and vibration alarms
- Long battery life
- Ergonomic, durable design for indoor/outdoor use
- NIJ 0602.02-compliant

PD140E 1500180-28

BV 5030 - X-RAY BAGGAGE SCANNER

A high-resolution, single-view X-ray baggage inspection system designed to screen bags and parcels for concealed threats. It delivers detailed imaging with automatic detection of prohibited items such as weapons, explosives, and contraband, making it suitable for schools, transportation hubs, and secure facilities.

- Can be easily and deployed in any facility
- Ideal solution for security sensitive locations with restricted space
- Unique software system for automated detection of firearms, knives, ammunition and pyrotechnics

BV 5030 ..... Call for Part Numbers

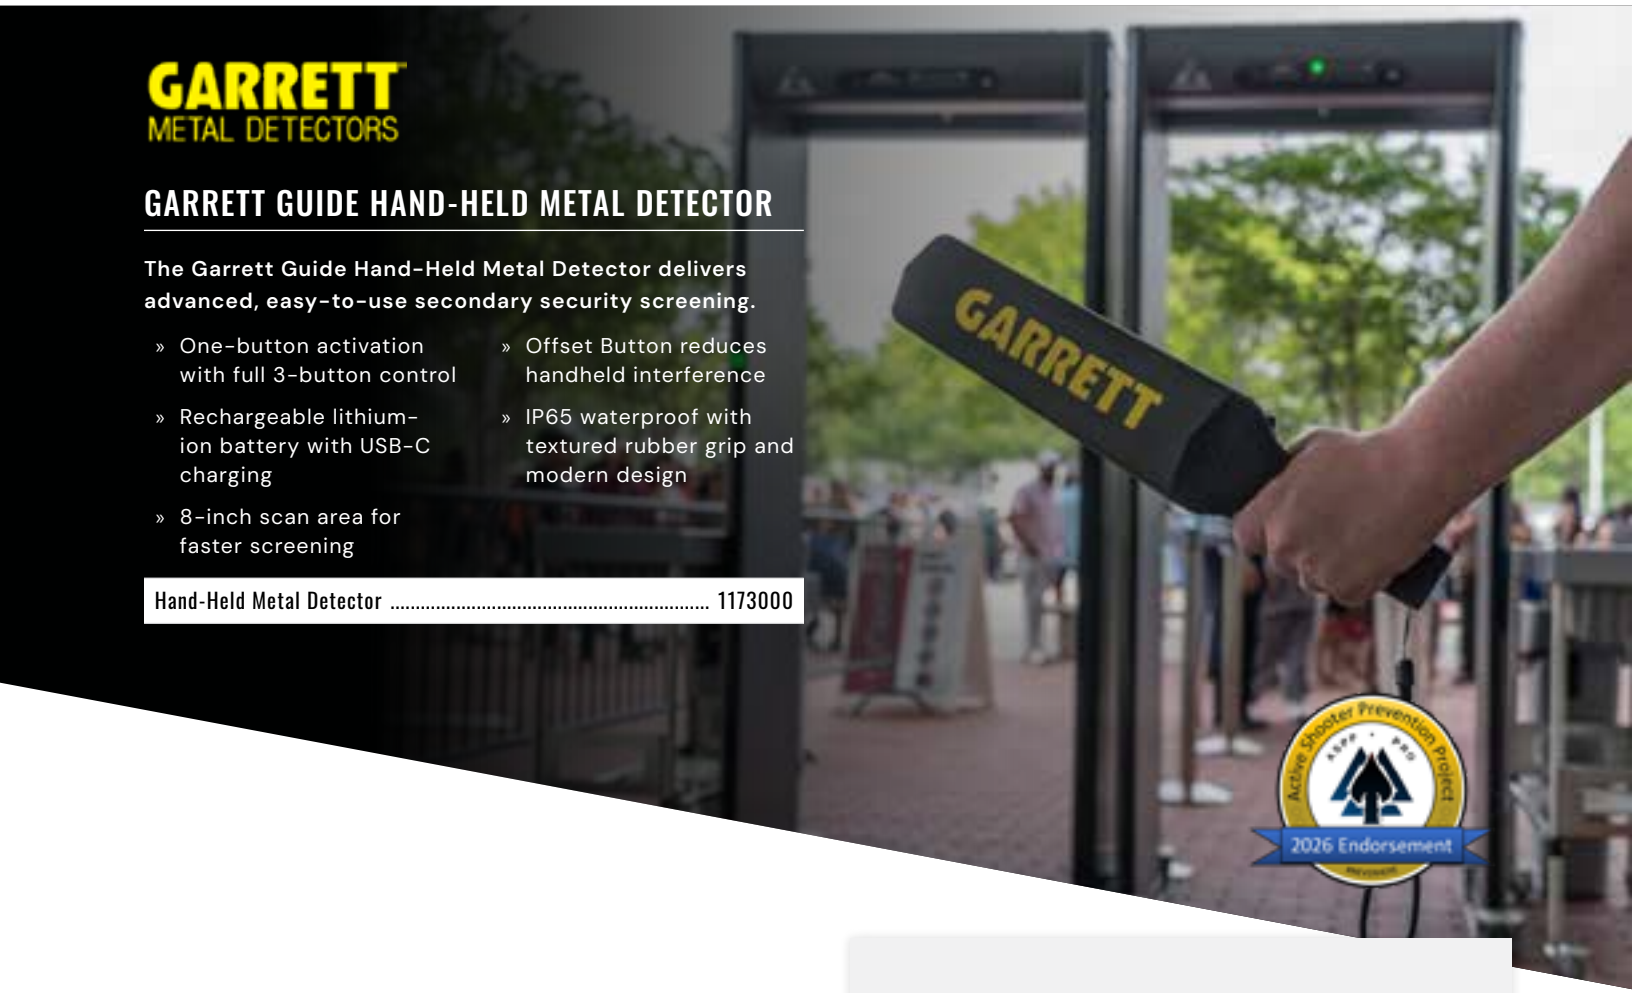

GARRETT
METAL DETECTORS

GARRETT GUIDE HAND-HELD METAL DETECTOR

The Garrett Guide Hand-Held Metal Detector delivers advanced, easy-to-use secondary security screening.

- One-button activation with full 3-button control
- Rechargeable lithium-ion battery with USB-C charging
- 8-inch scan area for faster screening
- Offset Button reduces handheld interference
- IP65 waterproof with textured rubber grip and modern design

Hand-Held Metal Detector	1173000

GARRETT PARAGON™ WALK-THROUGH METAL DETECTOR

The Garrett Paragon™ Walk-Through Metal Detector delivers advanced threat detection with 66 pinpoint detection zones, dual-sided scanning, and customizable sensitivity settings. Designed for high-security environments, it provides fast, accurate screening while maintaining smooth pedestrian flow.

- 66 pinpoint detection zones
- Dual-sided threat detection
- Customizable sensitivity settings
- High-throughput screening
- Intuitive touchscreen interface
- Network-ready connectivity
- Indoor and outdoor operation
- Advanced discrimination technology

Walk-Through Metal Detector	1172001

SWABTEK NARCOTICS GO BAG

Each NTK Go Bag consists of 60 SwabTek Narcotics Test Kits, delivered in a single, zippered tactical bag for easy transport.

1 NTK Go Bag Contains:

- 1 Zippered Tactical Bag (10" long x 7.5" high x 1.5" deep)
- 10 SwabTek Fentanyl+ Test Kits
- 10 SwabTek Cannabis Test Kits
- 10 SwabTek Amphetamine Test Kits
- 10 SwabTek Cocaine Test Kits
- 10 SwabTek Heroin Test Kits
- 10 SwabTek General Narcotics Test Kits

SwabTek Narcotics Go Bag ..... Call for Part Numbers

HALO 3C SMART SENSOR

The HALO 3C Smart Sensor is an all-in-one environmental, health, and safety monitoring device designed for privacy-sensitive areas where cameras are not appropriate, such as restrooms, locker rooms, and healthcare spaces. Using multiple built-in sensors, it detects vaping, air quality issues, gunshots, aggression, occupancy, and other safety events, providing real-time alerts and integrating with existing security systems to improve situational awareness without recording video.

- Detects vaping, THC, smoke, gunshots, and air quality events
- Privacy-safe monitoring with no cameras or video recording
- Real-time alerts and integration with VMS and security platforms
- Environmental monitoring, occupancy detection, and people counting (select models)
- Cloud analytics, reporting, and device health monitoring
- Easy deployment with scalable, enterprise-ready management

HALO 3C Smart Sensor ..... Call for Part Numbers

FS286 VAPE & BULLYING DETECTOR

FlySense® identifies and then alerts you of vaping, bullying, and device tampering activities. Enabling you to monitor vaping and bullying 24/7 in areas where cameras are prohibited.

FS286 Vape & Bullying Detector ..... Call for Part Numbers

TRTN-UA001

The Triton Ultra Sensor is an advanced detection device that identifies vaping, THC, aggression, and environmental events such as screams and glass breaks. It provides real-time alerts, cloud connectivity, and optional people counting and loitering detection for enhanced security.

TRTN-UA001 ..... Call for Part Numbers

SCOTCHSHIELD™

High-performance window film that strengthens glass, improves security, and reduces UV and solar heat while maintaining a clear, low-reflective appearance.

- Maintains high optical clarity
- Low-reflective "nearly invisible" finish
- Works on existing glass (retrofit install)
- Strengthens glass against breakage
- Helps deter forced entry
- Blocks up to 99% UV rays
- Reduces heat & glare

Scotchshield™ ..... Call for Part Numbers

AMERICAN DEFENSE SOLUTIONS

ADS DEFENDER™ SECURITY FILM

ADS Defender™ Security Film strengthens existing glass doors and windows against forced entry, severe weather, and glass breakage. This transparent film helps hold shattered glass together, delays unauthorized entry, blocks up to 98% of UV rays, and preserves the appearance of existing glass. Available in three protection levels and custom installed for commercial and institutional facilities.

- Strengthens existing glass against forced entry
- Helps contain shattered glass
- Available in three protection levels
- Transparent, low-visibility appearance
- Blocks up to 98% of UV rays
- Provides solar control benefits
- Custom installed for each facility
  Ideal for schools, healthcare, government, and commercial buildings

ADS Defender™ Security Film ..... Call for Part Numbers

ENFORCEAIR 2

D-FEND SOLUTIONS

EnforceAir2 is a next-generation counter-UAS system that uses RF-cyber technology to detect, identify, and safely take control of unauthorized drones without jamming or kinetic effects. It enables controlled landings or returns while preserving communications and GNSS, and supports scalable fixed, mobile, and vehicle-mounted deployments for public safety, critical infrastructure, and sensitive environments.

- » RF-cyber drone detection and mitigation
- » Non-jamming, non-kinetic takeover
- » Controlled landing/return of unauthorized drones
- » Preserves comms and GNSS
- » Scalable fixed/mobile deployments

EnforceAir 2 ..... Call for Part Numbers

SkySafe

SKYSAFE

SkySafe delivers advanced drone awareness built on deep analysis of drone communication protocols, providing comprehensive data, real-time alerts, and actionable threat insights. Its cloud-based platform supports broad, flexible coverage while enabling both effective drone threat assessment and the safe integration of compliant commercial drone operations through future-forward technology.

Skysafe ..... Call for Part Numbers

sentrycs

SENTRYCS PORTABLE KIT

The Sentrycs Portable Kit is a rapidly deployable, cyber-based counter-UAS solution that passively detects, identifies, and takes control of unauthorized drones using RF protocol manipulation. Designed for mobile and temporary operations, it enables safe landing or mission termination without jamming, spectrum interference, or kinetic effects, making it ideal for public safety, defense, and critical infrastructure protection.

Sentrycs Portable Kit .... Call for Part Numbers

DRONESHIELD

DRONESENTRY-X MK2

DroneSentry-X Mk2 is a software-defined detection and adaptive disruption system, designed for mobile, field expedient pop-up, and fixed site protection. Engineered for seamless deployment across land, sea, and air platforms, it provides real-time drone detection and mitigation in complex operational environments.

DroneSentry-X Mk2 ..... Call for Part Numbers

ECHODYNE

ECHOSHIELD

EchoShield is a compact, tactical-grade radar that delivers continuous detection and tracking of air, ground, and maritime targets. Built for rapid deployment and reliable operation in complex environments, it supports fixed and mobile installations and provides consistent situational awareness for perimeter security, wide-area surveillance, and counter-UAS operations.

Echoshield ..... Call for Part Numbers

DRONE SKY DEFENDER

UAS SENTRY POE + LTE

UAS Sentry PoE / LTE delivers continuous air-domain awareness for counter-UAS operations by detecting and tracking drones in real time. Designed for fixed or mobile deployments, it supports PoE and LTE connectivity, ruggedized outdoor operation, and 24/7 autonomous monitoring—making it well-suited for critical infrastructure, events, and perimeter security where persistent drone detection is required.

UAS Sentry POE + LTE ..... Call for Part Numbers

SKYDIO X10

Skydio

Skydio X10 combines advanced AI flight assistance with high-resolution visual and radiometric sensors, including the integrated FLIR Boson+ thermal camera (640×512 px, ≤30 mK). Capture detailed imagery in GPS-denied or high-EMI environments with obstacle avoidance and modular sensors, giving reliable data wherever and whenever you need it.

Skydio X10 ..... Call for Part Numbers

FOTOKITE SIGMA

FOTOKITE

Fotokite Sigma delivers elevated situational awareness for public safety with fully automated, actively tethered drones. Launch, fly, and land with one button—no piloting required—and recognized by aviation authorities as a safer alternative to free-flying systems.

- Advanced Wide/Zoom and Thermal Cameras
- Available in Multiple Configurations
- 2.8 lbs (1.3 kg) Carbon Fiber Frame
- 24+ Hours Flight Time
- 150ft/45m Maximum Altitude
- Rugged and IP55 Rated
- No Piloting Necessary: Exempt from Pt. 107 and COA (USA)

Fotokite Sigma ..... Call for Part Numbers

AIRREADY XL18

ProximaVision

The AirReady XL18 is a tethered aerial surveillance system providing persistent situational awareness up to ~700 ft AGL. Its modular EO/IR sensors, fiber-optic data link, and remote command/control enable high-definition video, real-time analytics, and safe operation in GPS-denied or extreme environments for defense, security, and emergency response.

AirReady XL18 ..... Call for Part Numbers

KHRONOS

ELISTAIR

Khronos is a fully automated tethered drone-in-a-box system that provides persistent aerial surveillance from fixed or vehicle-mounted platforms. It enables rapid launch, continuous powered flight, and secure data transmission for long-duration ISR and situational awareness missions.

- Automated launch and recovery
- Continuous tether-powered operation
- Secure data and power over tether
- Fixed or mobile deployment
- Supports EO/IR payloads for day/night monitoring

Khronos ..... Call for Part Numbers

SCYLLA

The AI Detecting Threats Others Miss

At Scylla, our mission is to create the best possible AI tech for video surveillance. As a technology-first company, we are committed to leveraging our expertise to deliver unparalleled precision and reliability in our solutions. We not only prioritize safety but also develop highly precise and sensitive AI solutions for video surveillance and security at large. We believe that through innovation and technology, we can provide our clients with the tools they need to protect what matters most and improve operations of their organizations.

Solutions

- Military Grade Gun Detection System
- Knife Detection System
- XactID Face Recognition in the Wild
- Face Recognition - Auto Enrollment
- Aggresive Behaviour Detection
- Slip and Fall Detection System
- Suspicious Shopping Behaviour Detection
- Scylla Object Detection and Tracking
- Perimeter Intrusion Detection System
- Scylla Asteria™ Smart Edge Monitoring Solution
- Vehicle Identification and Tracking

For information contact Safeware Government Security Solutions - info@safewareinc.com

How it Works

Scylla processes video stream

Scylla processes video stream content to develop meaningful insights about the activity and objects.

Scylla's algorithm Charon verifies information

Scylla verifies the suspicious content in real-time through the Smart Decision-Making algorithm "Charon". Information on the object, activity or identity is retrieved and forwarded to the alerting protocols.

Scylla distributes alerts

Scylla distributes alerts in real-time to security response units through web and mobile channels with a relevant screenshot and complete information about the location and time of the incident.

Scylla works with

CCTV Cameras

UAV Cameras

Bodycams

Databuoy

SHOTPOINT®

Databuoy's automated SHOTPOINT system is the fastest, most precise fully automated gunshot detection and localization platform.

SHOTPOINT is the only solution that can be deployed in both indoor and outdoor environments

SHOTPOINT allows first responders, security personnel and law enforcement to react to an active shooter situation with confidence and precision.

Our multi-source acoustic localization method provides the most reliable gunshot detection system on the market. SHOTPOINT is used indoors and outdoors with sensors deployed in small indoor spaces or large areas such as gymnasiums, tall atriums, or stadiums.

In an outdoor environment, SHOTPOINT shines, giving customers an unfair advantage when securing their property. Our wide-area outdoor coverage is unmatched, with sensors placed up to 165 ft. apart and often located in the most volatile environments imaginable

Industry-leading Precision

Reports in less than 2 seconds providing a shooter's location within 2 meters.

- **2 Second Reporting**
- **Video Integration**
- **Mobile Reporting**
- **Multiple Shooter Support**
- **Bullet Trajectory Resolution**
- **Pinpoint Location Accuracy <2m**
- **Near Zero False Alarm Rate**
- **Third-Party Validated**

For information contact Safeware Government Security Solutions - info@safewareinc.com

WHOOSTER INVESTIGATIVE DATA SOLUTIONS

Whooster provides investigative data solution tools to law enforcement, government agency and business sector clients who need to find out – 'Who', 'What' and 'Where' as well as discovering non-obvious links between the who, what, and where.

Whooster Data Solutions is an investigative intelligence platform that combines open-source intelligence (OSINT) with proprietary and private data sources to deliver real-time, historical, and actionable information on people, businesses, and assets. Powered by the OWL Intelligence Platform, it enables law enforcement, government agencies, and commercial organizations to conduct investigations, verify identities, support compliance initiatives, and uncover relationships through a unified web interface, SMS access, or API integrations.

KEY FEATURES

- Real-time and historical people, business, and asset intelligence
- OSINT and proprietary data integration
- Identity verification, fraud detection, and compliance support
- Relationship analysis and investigative reporting
- Web, SMS, and API access for seamless integration
- Secure, scalable platform for investigative workflows

SOLUTIONS

- Law Enforcement & Public Safety
- Government & Defense
- Corporate Security
- Insurance & Financial Services
- Investigations & Legal
- Risk Management & Compliance
- Collections & Recovery
- Retail & eCommerce

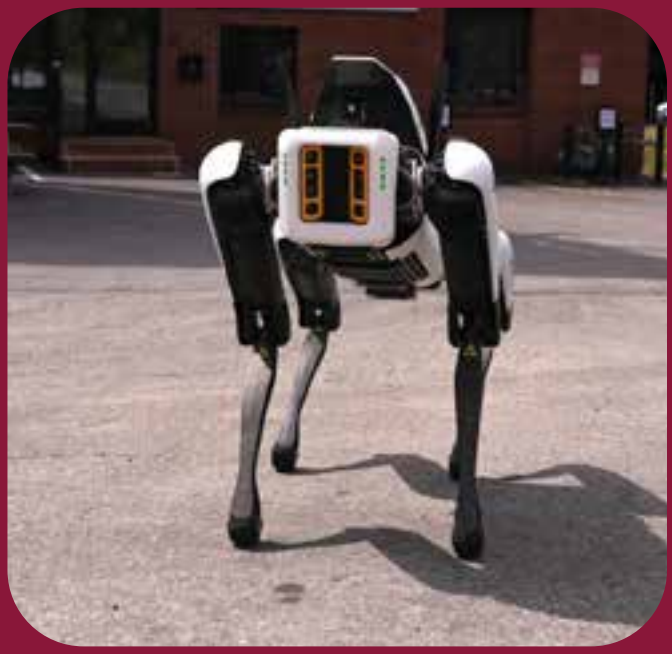

The Future of Ground Patrol

MEET DRONEDOG™
YOUR AUTOMATED SECURITY PARTNER

DroneDog™ is your agile, all-terrain robotic partner—engineered to patrol complex environments, adapt on the move, and stay alert when humans can't.

Equipped with thermal and electro-optical cameras, real-time data analytics, and powered by DronelQ software, DroneDog™ works side-by-side with the Robotic Security Operations Center (RSOC) to detect threats faster, respond smarter, and extend your team's capabilities beyond human limits.

REQUEST A QUOTE TODAY

MOBILE SECURITY UNIT

LiveView Technologies (LVT) mobile surveillance units are rapidly deployable, solar-powered security trailers that deliver 24/7 video monitoring, AI-driven detection, and active deterrence for temporary or high-risk sites.

- Towable, self-contained surveillance trailer
- Solar-powered with battery backup and cellular connectivity
- HD cameras with optional thermal imaging
- AI-based intrusion detection and analytics
- Integrated speakers, strobes, and remote monitoring
- Automatic License Plate Recognition (LPR) with real-time vehicle alerts and searchable license plate data

Mobile Security Unit ..... Call for Part Numbers

SWIFT POLE CAMERA

TACTICAL ELECTRONICS

The SWIFT Pole Camera is a compact, rapid-deploy inspection camera that provides simultaneous low-light color and thermal video, giving operators immediate visual intelligence in confined or high-risk spaces.

- Dual low-light color and thermal imaging
- Telescoping pole with quick, one-handed deployment
- Integrated LCD monitor with split-screen view
- Lightweight, battery-powered for rapid use

Swift Pole Camera ..... Call for Part Numbers

OMNICAST™ VIDEO MANAGEMENT SYSTEM

Genetec Security Center Omnicast™ is an enterprise-class IP Video Management System (VMS) designed to help organizations monitor, record, investigate, and manage video surveillance across single or multiple sites. Built on the Genetec Security Center unified security platform, Omnicast integrates video surveillance with access control, automatic license plate recognition (ALPR), intrusion detection, communications, and other security systems to provide operators with a centralized view of security operations. Its open architecture supports a wide range of IP cameras and analytics, while scalable deployment options allow organizations to expand from small installations to large, multi-site enterprise environments.

Genetec Omnicast™ Video Management System ..... Call for Part Numbers

milestone

MILESTONE XPROTECT®

Milestone XProtect® is an open-platform Video Management System (VMS) that centralizes video surveillance, cameras, sensors, and analytics into a single management platform. Designed for organizations of all sizes, XProtect offers broad device compatibility, scalable deployments, and extensive third-party integrations, allowing users to monitor, investigate, and manage security operations across single or multiple sites. Available for on-premises, cloud, or hybrid deployments, it provides the flexibility to grow with evolving security needs.

- Live video monitoring, recording, and playback
- Open platform with broad camera and third-party integration support
- Multi-site management via web, desktop, and mobile clients
- Advanced search, alarms, maps, and evidence management
- Enterprise security with encryption, SSO, and role-based access
- Scalable on-premises, cloud, or hybrid deployment options

Milestone XProtect® ..... Call for Part Numbers

rhombus

RHOMBUS CONSOLE CLOUD VMS

The Rhombus Console is a cloud-native Video Management System (VMS) that centralizes video surveillance, access control, alarms, and other physical security devices through a single web-based platform. It eliminates the need for traditional DVRs and NVRs by combining cloud management with intelligent edge devices, enabling users to monitor live and recorded video, investigate incidents with AI-powered search, receive real-time alerts, and manage multiple sites from anywhere.

Rhombus Console Cloud VMS ..... Call for Part Numbers

VERKADA COMMAND

Verkada Command is a cloud-based physical security management platform that centralizes video surveillance, access control, alarms, environmental sensors, visitor management, and other security devices in a single web-based interface. Designed for organizations of all sizes, Command enables users to monitor live and recorded video, investigate incidents with AI-powered search, receive real-time alerts, and manage devices, users, and multiple sites from anywhere using a web browser or mobile app.

- Cloud-based video monitoring, recording, and playback
- AI-powered search, alerts, and event-based investigations
- Centralized multi-site and user management
- Unified platform for video, access control, alarms, and sensors
- Secure remote access via web and mobile apps
- Enterprise security with SSO, MFA, role-based access, and audit logs
- Automatic updates and device health monitoring
- Infinitely scalable cloud architecture

Verkada Command ..... Call for Part Numbers

Verkada

HONEYWELL PRO-WATCH®

Honeywell Pro-Watch® / WIN-PAK® is an integrated access control platform that manages doors, credentials, video surveillance, and intrusion systems through a centralized interface.

Designed for organizations ranging from single-site facilities to large enterprises, it provides scalable security management with support for remote monitoring and third-party integrations.

Honeywell Pro-Watch® ..... Call for Part Numbers

LENEL·S2 by Honeywell

LENELS2 NETBOX

LenelS2 NetBox is a scalable, browser-based access control and security management platform that unifies access control, alarm monitoring, reporting, video integration, and mobile management into a single solution.

- Integrated video surveillance and event verification
- Scalable architecture for single-site or enterprise deployments
- Threat level management and facility lockdown capabilities
- Open API for third-party system integration
- Mobile access and remote system management
- Automated reporting, audit trails, and system backups

LenelS2 NetBox ..... Call for Part Numbers

LENELS2 ONGUARD

LenelS2 OnGuard is an enterprise security management platform that combines access control, video surveillance, alarm monitoring, identity management, and advanced reporting into a unified, scalable solution.

- Real-time situational awareness/incident response tools
- Scalable architecture for multi-site and global deployments
- Browser-based management and mobile-ready access
- Open API and extensive third-party system integrations
- Credential, visitor, and identity management capabilities
- Advanced reporting, auditing, and compliance tools
- Threat level management and emergency lockdown functionality
- Support for biometric, smart card, and mobile credentials

LenelS2 OnGuard ..... Call for Part Numbers

GENETEC SYNERGIS CLOUD LINK

The Genetec Synergis Cloud Link is a secure, PoE-enabled gateway that connects access control hardware to the Genetec security platform, supporting on-premises, hybrid, and cloud deployments.

- Open architecture supporting a wide range of controllers and electronic locks
- Cloud-ready design for on-premises, hybrid, or SaaS deployments
- Secure communications with encryption and certificate-based authentication
- Native support for Mercury, HID, Axis, ASSA ABLOY, Allegion, and other devices
- Real-time access control, alarm monitoring, and event management
- Embedded threat level management and offline decision-making capabilities
- Peer-to-peer communication for enhanced system resilience
- Scalable platform supporting hundreds of readers, locks, and devices

Genetec Synergis Cloud Link ..... Call for Part Numbers

SALTO KS

Salto KS is a cloud-based smart access platform that delivers real-time access control, remote management, and keyless entry through a scalable, wireless architecture.

- Mobile credentials, PIN codes, and smart key support
- Remote door unlocking and user management
- Wireless architecture with minimal infrastructure requirements
- Multi-site management from a single dashboard
- Open API and third-party software integrations
- Offline operation and encrypted communications for enhanced security
- Scalable solution for small businesses to enterprise deployments

Salto KS ..... Call for Part Numbers

VERKADA ACCESS CONTROLLERS

Verkada Access Controllers combine cloud-based management with enterprise-grade reliability, delivering scalable access control, remote administration, and seamless integration with the Verkada security platform.

- Remote management from web and mobile devices
- Scalable architecture for single-site or multi-site deployments
- Native integration with video security, alarms, and visitor management
- Automatic firmware updates and cybersecurity protections
- Offline operation with local processing and cached credentials
- Real-time monitoring, alerts, and event management
- Flexible controller options for 1, 4, or 16-door deployments
- Compatibility with a wide range of readers, locks, and peripherals

Verkada Access Controllers ..... Call for Part Numbers

ASSA ABLOY

APERIO® H100 ELECTRONIC HANDLE

The Aperio® H100 is a battery-powered wireless door handle that adds flexible access control to interior doors with easy retrofit installation and broad RFID credential support.

- Adds access control to existing mechanical locks with no drilling required
- Wireless design built for high-traffic environments
- Compatible with wood, steel, tubular-frame, and glass doors
- Retains existing mechanical cylinder
- Integrates with third-party access control systems
- Online or offline operation with RFID and Mobile Access (BLE) support
- Modern, low-profile design with LED status indicator and easy battery replacement

Aperio® H100 Electronic Handle ..... Call for Part Numbers

APERIO® WIRELESS LOCKS

ASSA ABLOY Aperio® wireless locks extend access control to interior and exterior doors without requiring complex wiring. Integrated with Incedo, they support card, token, and mobile credentials for flexible access management.

- Extends access control beyond primary entry points
- Compatible with card, token, and mobile credentials
- Seamless integration with the Incedo access control platform
- Available as cylinders, escutcheons, security locks, and electronic handles
- Built-in RFID reader options available
- Supports online and offline deployment
- Suitable for offices, healthcare facilities, schools, universities, and commercial buildings
- Available in multiple door formats and configurations
- Scalable platform with expanding lock and integration options

Aperio® wireless locks ..... Call for Part Numbers

ALLEGION

SCHLAGE AD-200 OFFLINE LOCK

Schlage AD-200 is a standalone electronic lock that provides secure offline access control, credential flexibility, and a modular design that supports future migration to a networked system.

- Audit trail reporting for user activity and events
- Compatible with smart cards, mobile credentials, PINs, and proximity cards
- Available in cylindrical, mortise, deadbolt, and exit trim configurations
- Supports remote release and occupancy indication options
- Battery-powered operation with optional external power
- Compatible with major master key systems and exit devices

Schlage AD-200 Offline Lock ..... Call for Part Numbers

ENTRYPROX™ STANDALONE PROXIMITY READER

Honeywell

The EntryProx™ standalone proximity reader provides secure single-door access control for small or remote sites, combining HID® proximity credential support with keypad entry and optional system integration.

- Compatible with HID proximity cards and keytags
- Integrated keypad for PIN entry and programming
- Configurable for integration with online access control systems
- Supports batch enrollment of up to 2,000 credentials
- Block Delete feature simplifies credential management
- Weather- and vandal-resistant design for indoor or outdoor installation
- Flexible mounting with remote antenna placement up to 10 feet away
- Invalid PIN lockout feature enhances security
- IP55 certified and ADA compliant

EntryProx™ Standalone Proximity Reader ..... Call for Part Numbers

KP-11 5-WIRE ACCESS KEYPAD

The KP-11 is a durable access control keypad that enables secure, card-free entry using PIN codes. Built with stainless steel and piezo touch technology, it delivers reliable performance in harsh indoor and outdoor environments.

- PIN-based access control with no cards required
- Stainless steel, impact-resistant construction
- Weather- and vandal-resistant design
- Suitable for indoor and outdoor installations
- Piezo touch technology with no moving parts
- Audio and visual feedback for key presses
- Status monitoring LEDs and power indicator
- Wiegand output emulation for system integration
- Selectable 5V or 12V operation
- Programmable site code support

KP-11 5-Wire Access Keypad ..... Call for Part Numbers

AXIS A4610 NETWORK READER

AXIS COMMUNICATIONS

The AXIS A4610 is a compact IP-based network door reader that combines access control, lock control, REX, and door monitoring in a single device. With PoE and RFID support, it delivers secure, touch-free access for indoor and outdoor use.

- Single-cable PoE installation for power and network connectivity
- Supports RFID cards and key fobs
- Integrated control of door lock, REX, and door position monitoring
- Compact mullion-mount design for narrow door frames and tight spaces
- Scratch-resistant glass front panel
- Built-in cybersecurity and tamper detection features
- Remote management, configuration, and firmware updates
- Supports up to 16 readers per Axis door controller
- IP55-rated weather-resistant construction

AXIS A4610 Network Reader ..... Call for Part Numbers

Alcatraz AI - Facial Authentication Access Control System

Reimagine your access control experience with Alcatraz. Our facial authentication solutions seamlessly combine enterprise-grade security and robust privacy with effortless access to create safer, smarter environments.

Alcatraz natively integrates with existing access control systems, offering effortless enrollment and authentication, while providing scalable, future-proof security through continuous updates and advanced features like tailgating detection.

Our award-winning facial biometric authentication device operates at the edge and is powered by machine learning and AI to deliver a rock-star level access control experience. Offers tailgating detection, video at the door, supports SIP based intercom, 3D liveness detection, and more in a single device. Seamlessly blends into your corporate environment and operates rain or shine.

For information contact Safeware Government Security Solutions - info@safewareinc.com

- » Easy to integrate and deploy
- » Effortless to enroll and authenticate
- » Engineered to scale and evolve
- » Privacy at the core
- » Tailgating Detection
- » Works in all conditions

PREVENTION STARTS BEFORE VIOLENCE BEGINS

ACTIVE SHOOTER PREVENTION PROJECT™

Chris Grollnek, M.S.

Chairman, Active Shooter Prevention Project™

The Active Shooter Prevention Project™ (ASPP™) P.R.O. Model™ (Prevention. Response. Options.) offers a prevention-first operating framework designed to support earlier awareness, clearer coordination, and more measurable readiness over time. Rather than focusing solely on response, the model emphasizes practical steps organizations can take to strengthen preparedness, align leadership and operations, and create shared accountability.

Through a structured 30-, 60-, and 90-day approach, ASPP™ P.R.O. helps organizations translate intent into tangible deliverables - establishing a thoughtful path toward Destination #NEVERHERE™, where prevention is treated as a sustained organizational capability rather than a reactive obligation.

- » Threat & Vulnerability Assessments
- » Training Seminars
- » Response Drills
- » Advisory Support
- » Leadership Consultation

ASPP COMMUNITY OF EXPERTS

The ASPP Community of Experts consists of a group of mission-focused individuals who are leading the PREVENTION first charge. ASPP's values and goals have aligned with several companies that offer a wide array of products and services. These resources have been incorporated into the P.R.O. Model™ as viable options:

Our team believes in an all-hazards approach to emergency preparedness and recognizes there is no "magic pill" to solve all problems the same way. We are educating the public and helping organizations succeed in preventing and responding to critical incidents using a layered approach while incorporating real-world solutions.

Safeware is honored to be part of the ASPP Community of Experts, a group of mission-focused individuals who are leading the PREVENTION first charge.

ASPP LEADERSHIP & ADVISORY COUNCIL

Chris Grollnek, M.S.

Chairman, Active Shooter Prevention Project™

Chris Grollnek is a globally recognized expert in active shooter prevention, public safety, and strategic leadership. With 35 years of experience spanning executive, C-Suite, and Board roles, he has built a reputation for translating complex challenges into actionable solutions. As a thought leader and industry pioneer, Chris has been instrumental in reshaping security and safety protocols, advocating for a proactive, prevention-first approach to preventing Domestic Terrorism and through an all-hazard approach. His expertise extends across operations leadership, M&A strategy, and organizational transformation.

Dave Glaser

Major General, US Army (Retired), Strategic Leadership Consultant (TX)

Major General (Ret.) David Glaser brings more than 36 years of military, homeland security, strategic leadership, and organizational transformation experience to ASPP. Throughout his career, he has led complex operations and large-scale organizations at the tactical, operational, and strategic levels, including command assignments in combat and senior leadership roles focused on security, resilience, crisis response, workforce development, and institutional strategy.complex security and operational challenges.

Hannah V. Betz

SHIFT HR COMPLIANCE TRAINING

ASPP·PRO —E PLURIBUS UNUM—

Active Shooter & Active Threat Preparedness Training

Every School Has a Plan. Not Every School Is **Prepared.**

PREPARE PEOPLE - NOT JUST PLANS

Schools invest significant time developing emergency plans, conducting drills, and establishing procedures.

Plans establish procedures.
Training prepares people.

SHIFT's **Active Shooter & Active Threat Preparedness** course equips educators and staff to recognize warning signs, strengthen situational awareness, and make informed decisions in high-stress situations. Through practical, behavior-focused learning—not fear-based tactics—the course prepares educators to make informed decisions when every moment matters.

20 Minutes Self-paced | Mobile Friendly | WCAG 2.1 AA | English, Spanish (Others available) | Hosted by SHIFT or your LMS

DEVELOPED IN COLLABORATION WITH CHRIS GROLLNEK

Nation's Leading Active Shooter Prevention Expert

Creator of the ASPP P.R.O. Model™, a prevention framework selected by the U.S. Department of Justice as "A" national standard for active shooter prevention training. For more than three decades, Chris has helped schools, law enforcement, and organizations strengthen prevention, preparedness, and decision-making through practical, prevention-focused training.

THIS COURSE HELPS EDUCATORS AND STAFF

- **Recognize** Warning Signs
- **Strengthen** Situational Awareness
- **Build** A Culture of Preparedness
- **Make Better Decisions** Under Pressure
- **Respond** With Greater Confidence

PREPAREDNESS STARTS WITH SHIFT

SHIFT develops expert-led training that prepares people for the moments where decisions matter most. Builtwwwww with nationally recognized subject matter experts and grounded in behavior-focused learning, our courses help organizations strengthen preparedness through better awareness, better judgment, and better decisions.

The Incident

Tabletop Simulations

Crisis Response Leader Training (CRLT) stands as a trailblazer in safety and security simulation training.

Prioritize School Safety with CRLT

Is ensuring the safety of your school community your primary concern? At CRLT, we offer a solution that brings together school resource officers, faculty, administrators, and local emergency responders to collaboratively prepare for a safer future.

Through our "The Incident" simulations, users can:

- Develop life-saving response strategies
- Foster holistic teamwork for stronger community resilience
- Enhance employee well-being and confidence
- Improve knowledge retention while ensuring compliance
- Increase the frequency of training sessions
- Optimize training investments

Choose CRLT for comprehensive school safety preparation that empowers your team and secures your campus.

Immersive and Stimulating Scenarios

- Designed for Emergency Managers, First Responders, and Employees
- Seamlessly Integrated Learning Management in 3D Scenarios
- Tailored Solutions, from Fundamental to Bespoke
- Flexibility: Choose Between Download or Cloud-based Services
- Unlimited Training Access Throughout the Year
- Benefit from Cost-efficient Bulk License Discounts

Experience engaging and thought-provoking scenarios that equip emergency managers, first responders, and employees with essential skills. Our integrated learning approach within dynamic 3D environments ensures efficient training solutions. With a range of customizable options and accessible delivery modes, CRLT empowers you to make the most of your training investment.

Emergency Response SIMULATIONS

Virtual Emergency Response Simulkation Training

Strengthen School Emergency Preparedness with virtual ERSimulations training

Help schools, districts, and campus public safety teams prepare for critical incidents through immersive, simulation-based training.

ERSimulations enables educators, school resource officers, administrators, and local first responders to train together in realistic virtual environments, improving coordination, communication, and emergency response before an incident occurs.

Choose ERSimulations to strengthen school emergency preparedness through realistic, immersive training that builds confidence, coordination, and response capabilities across your entire campus community.

Through ERSimulations training, schools can:

- Prepare for active threat, fire, HazMat, and mass casualty incidents
- Strengthen coordination between school staff and first responders
- Practice Incident Command and emergency response procedures
- Build custom scenarios based on school campuses and facilities
- Improve communication, decision-making, and team readiness
- Conduct safe, repeatable training to reinforce emergency plans

Prepare your school community with immersive virtual training designed for today's evolving safety challenges. ERSimulations enables educators, school administrators, campus public safety, and local first responders to train together through realistic, customizable scenarios that improve coordination, confidence, and emergency readiness—all in a safe, repeatable training environment.

BULLET RESISTANT DOORS

SafeWood Designs Bullet-Resistant Wood Doors provide discreet ballistic protection for schools without compromising the learning environment.

- UL 752 Levels 1–8 available
- Helps resist forced entry and ballistic threats
- Custom wood species, finish, and design options
- Integrates with existing locking and access control systems
- Available with bullet-resistant glazing
- Designed to blend with school interiors
- Custom sizes for retrofit or new construction

Bullet Resistant Doors ..... Call for Part Numbers

MITHIX PRO DOOR SECURE CLAW

MithiX Pro Door Secure Claw is a rapid-deployment door barricade designed to temporarily secure inward- or outward-opening doors during active threat incidents and emergency situations. The reusable device installs quickly without tools, helping delay unauthorized entry while providing occupants with valuable response time. Ideal for schools, offices, and public facilities.

MithiX Pro Door Secure Claw ..... MXP-DSCLAW 3-Pack

BULLETSHIELD

Retrofit UL 752 Bullet Resistant Glazing Security Panels

Protect your building's most vulnerable asset—its glass—with BulletShield, the ultimate in ballistic-grade polycarbonate shields. Known as "Body Armor for Windows," BulletShield is expertly designed to deliver exceptional bullet resistance and unparalleled protection, safeguarding what matters most.

- Professionally Installed Retrofit System
- UL 752 Standard Ballistic Protection
- Cost-Effective Customization

THE WAVE PLUS SYSTEM: THE ULTIMATE CRITICAL INCIDENT NOTIFICATION SYSTEM

- Transmits unique, detailed, customized messages instantly to all hand-held radios in the network
- Can send e-mails and text messages
- Can be configured to transmit alarm messages over up to four different radio channels
- Compatible with a wide variety of sensors, including panic buttons, door/window contacts, motion detectors, and others
- Virtual buttons can be added to computers within your network *
- Messages/buttons are easily added or changed are your needs change
- Sensors can have customized schedules
- Other devices or security systems including access control, cameras, strobe lights, digital signs, and PA systems can be triggered using relays or a serial data interface
- Popup alarms can be transmitted to computers in your computer network **
- Compatible with UHF, VHF, 800 MHz; analog or digital; conventional or trunked radio networks ***
- Self-contained system with battery backup
- System operates on a 927MHz network and does not use your WiFi at all
- Two-year warranty provided with all new systems

ADDITIONAL INFO:

* virtual buttons can be put on computers with Windows OS within the same computer network as the WAVE Plus control panel.

** popup alarms utilize UDP transmissions within the same computer network as the WAVE Plus control panel.

*** customer must provide radio(s) to integrate into the control panel if any network other than a standard analog radio is used.

EMERGENCY RESPONSE LOCKER

The Emergency Response Locker is a rugged, wall-mounted storage solution designed to securely house critical emergency response equipment in a centralized, highly accessible location. Built for schools, campuses, and public facilities, it supports rapid deployment during active incidents by keeping essential gear organized, protected, and immediately available. The weather-resistant steel construction allows for both indoor and outdoor installation, while secure locking options help prevent unauthorized access until needed.

- Pre-staged rapid-response gear access
- Heavy-duty 16-gauge steel construction
- Weather-resistant, outdoor-capable design
- Secure keyed and combination lock system
- Mountable in schools, campuses, and facilities
- Customizable kit configurations

Emergency Response Locker ..... Call for Part Numbers

APEX EMERGENCY RESPONSE LOCKER

The Apex Emergency Response Locker is a heavy-duty, wall-mounted tactical storage system designed to securely stage and rapidly deploy critical emergency response equipment in schools, campuses, and public facilities. Built for fast access in high-stress situations, it helps reduce response time while keeping gear protected, organized, and ready for immediate use.

- Pre-staged rapid-response equipment storage
- Heavy-duty steel construction with secure locking system
- Designed for schools and public safety environments
- Weather-resistant, mountable design for indoor/outdoor use
- Configurable kit options for different response needs
- Optimized for fast access during emergencies

APEX Emergency Response Locker ..... Call for Part Numbers

JERSEY BAR HALLIGAN

The Jersey Bar Halligan tool stands as an innovation and a force multiplier. It provides professionals in firefighting and tactical breaching with an advanced option that enhances functionality, durability, and effectiveness.

- Ready for use out of the box
- Dual offset adzes for controlled prying
- Depth indicators for precise placement
- Available in 24", 30", and 36" lengths
- Enhanced forks for hinges and padlocks
- Friction barbs reduce slippage
- Enlarged striking surface
  Made in the USA

Jersey Bar Halligan ..... Call for Part Numbers

JAMBER HAMMER

The JAMBER HAMMER isn't just a striking tool; it's a force multiplier. Weighing a mere 11 lbs, it's a perfect balance of power and agility, embodying the spirit of those who safeguard our communities.

- Breach outside of the fatal funnel
- Feed ramp designed to improve accuracy
- Elongated head to bypass any jamb
- Large strike plates for reduced penetration

Jamber Hammer ..... Call for Part Numbers

JTC CLAW

The JTC CLAW is not just a breaching tool; it is a force multiplier that empowers law enforcement and military professionals to tackle any challenge they face head-on. Weighing a mere 10 lbs., the CLAW comes in two lengths – 24" and 30" – providing versatility and adaptability in the field. Choose between Tactical Black or Safety Yellow, ensuring optimal visibility and a tactical advantage.

- Offered in two lengths 24" and 30"
- Offered in Tactical Black and Safety Yellow
- Non-slip hand grip
- Multi-Purpose – Combines a Sledge, Axe, Halligan and 20 other uses all into one.

JTC Claw ..... Call for Part Numbers

DYNAMIC ENTRY SPECIAL OPERATIONS ENTRY RAM

The Special Operations Entry Ram answers all the requests and suggestions from operators in the field for a compact yet powerful tactical entry ram. Its convenient ambidextrous design features one lead handle and two opposing side handles, allowing for multiple grip configurations to help meet mission-specific requirements.

- Non-sparking, electrically non-conductive handle system is resistant to 100,000 volts AC
- Ergonomic control-flex handle system reduces impact stress

Dynamic Entry Tactical Backpack Kit ..... BLA DE-SOER

ULTIMATE BREACHER TOOL

The UBT, when used with a Broco Jimmy tool, allows a single officer to open most inward and outward opening doors. These two tools make up a first responder breaching set.

Designed for Patrol breaching, the Broco Ultimate Breacher Tool (UBT) is four tools in one: sledge, pry, ram and rake. The UBT carries hands free on a quick release single point sling.

Ultimate Breacher Tool ..... Call for Part Numbers

FORCIBLE ENTRY TOOL T1

This hydraulic forcible entry tool allows you to cut, wedge, ram, spread, hammer, and lift. With the T1, you always have the right tool for the job.

- The T1 is a stand-alone tool, so you won't need batteries or an external pump
- Allows for high cutting & spreading forces in a compact tool design
- The T1 can cut, wedge, ram, spread, hammer, and lift. This means you always have the right tool for the job
- Saves weight and space in your vehicle

Forcible Entry Tool T1 ..... Call for Part Numbers

United Shield International

ASSAULT MXV BALLISTIC SHIELD

MXV shields combine lightweight ballistic composite construction with a durable painted front, rear "Load Out" system, and the Tri-Grip ERT handle system. The MXV Trapezoid viewport provides 77 sq. in. of visibility, delivering exceptional situational awareness with wide peripheral and downward ground vision.

- MXV Trapezoid View-Port, 13.5" x 5.5", 77 square inches on viewing area
- "Load Out" Rear shield feature, customizable to accept any pouches required for the mission
- Available in NIJ level IIIA and LW IIIA
- Forearm support straps at all hold positions
- Lightweight, high performance painted front

Assault MXV Ballistic Shield ..... Call for Part Numbers

SPECTER GEN II WIRELESS LED LIGHT

The Specter Gen II Wireless LED Light is a compact, fully removable 5,000-lumen wireless shield light designed for tactical operations. Featuring constant, strobe, and low-light navigation modes, it delivers powerful illumination without external wiring, while its lightweight waterproof design and rechargeable battery make it ideal for both new and retrofit ballistic shield setups.

- 5,000-lumen wireless LED output
- Constant, strobe, and navigation light modes
- No external wires or cables
- Lightweight, compact design
- Rechargeable battery system
- Waterproof construction
- Compatible with new and existing ballistic shields
- Quick attach/removal capability

Specter Gen II Wireless LED Light ..... Call for Part Numbers

GC

GC PATROL SHIELD®

A unique lightweight tactical shield at under 20lbs that exceeds the NIJ Level III Standard. Providing optimal rifle rated protection and life-saving tactical advantage against special threats with an unmatched ability to stop multiple handgun and rifle rounds, even edge shots.

Protection Levels:

- 7.62 x 39mm FMJ
- 7.62 x 39mm MSC
- 7.62 x 51mm M80
- 5.56 x 45mm M193
- 5.56 x 45mm JHP
- 12-gauge 1-ounce rifled slug
- .44 Magnum
- .357 Magnum
- 9mm FMJ

GC Patrol Shield ..... Call for Part Numbers

BLEEDING CONTROL KIT

The First Aid Only Bleeding Control Kit – Limb is a compact emergency response kit designed to control severe limb bleeding. It includes a windlass tourniquet, hemostatic gauze, trauma bandage, gloves, and clear instructions, packaged for fast access in critical situations.

Bleeding Control Kit FAO-91061

PUBLIC ACCESS BLEEDING CONTROL STATIONS

The North American Rescue Wall Mounted Bleeding Control Kit provides immediate access to lifesaving hemorrhage control tools in critical moments. Designed for high visibility and rapid response, it equips bystanders to act fast. Ideal for public spaces, workplaces, and schools, this kit enhances preparedness and helps save lives when every second counts.

Public Access Bleeding Control Stations 80-0474

SEAL HEMOSTATIC WOUND SPRAY

The first and only FDA-cleared chitosan aerosol spray

SEAL Hemostatic Wound Spray marks a significant advancement in emergency medical care, being the first and only FDA-cleared chitosan dry powder in aersol form. This innovative product acts as a physical barrier, effectively sealing wounds to stop blood flow.

- Simple administration with application time under 5 seconds
- Compact and easy to carry, making it ideal for a variety of settings

Seal Hemostatic Wound Spray ..... Call for Part Numbers

CUSTOM STOP THE BLEED KITS

Custom Stop the Bleed kits are built to meet your exact needs, delivering tailored bleeding control solutions for schools, workplaces, and public spaces. Designed for flexibility, each kit can be customized with essential tools, configurations, and branding. From classrooms to corporate offices and community environments, Vidlsourcing helps organizations stay prepared, respond faster, and protect lives when every second counts.

Custom Stop the Bleed Kits ..... Call for Part Numbers

BLEEDING CONTROL KITS

Severe blood loss, often caused by motor vehicle accidents, acts of violence and natural disasters, can result in death within minutes. The SAM medical bleeding control kit includes essential medical devices designed to limit blood loss in emergency and traumatic situations. After calling emergency personnel, this life preserving kit may help stabilize the injured in such events.

- **Kit Contains:** SAM XT Extremity Tourniquet, Medical Gloves, Medical Shears, Compressed Gauze, Permanent Marker, Emergency Bandage (6" wide), Instruction Card

Bleeding Control Kit	Call for Part Numbers

AUTOTQ® AUTOMATIC TOURNIQUET

Audio-guided automatic tourniquet designed for fast, effective control of severe extremity bleeding.

- Reusable inflator with disposable cuffs
- USB-C rechargeable battery
- Wi-Fi monitoring capability
- One-button operation
- Audio-guided instructions
- Automated pressure control

EVERTEL

Genasys™

Secure, Reliable, Compliant Cross-Agency Communication and Collaboration.

Provides secure, real-time communication and collaboration, addressing the strictest requirements of public safety agencies, hospitals, financial services, and secure business communications.

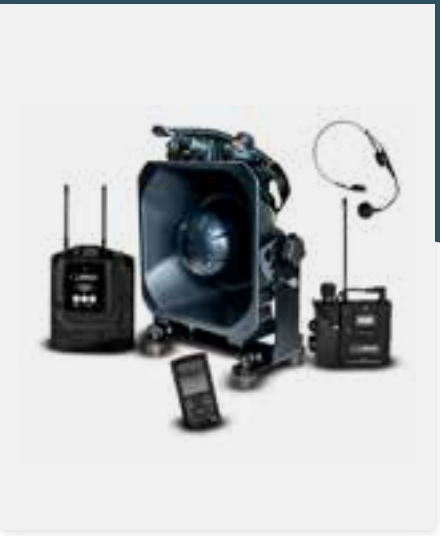

- Cut Response Time significantly with the ability to reach your team in real-time instead of email or briefings
- Keep your team up-to-date during crisis events
- Coordinate and Collaborate with regional agencies

EVERTEL ..... Call for Part Numbers

LRAD 100X MAG-HS KIT

The LRAD 100X MAG-HS Kit consists of an LRAD 100X, a high-strength magnet mount that clamps to, and unclamps from, magnetic surfaces with a turn of a knob, an LRAD Wireless Kit for remote operation, an AC-powered battery charger, an MP3 player with an all-weather record-on-the-fly mic, a watertight, dust-proof hard case, and other accessories. Self-contained, portable, and featuring an extended voice broadcast range out to 600 meters, the LRAD 100X ensures voice messages are clearly heard and understood. LRAD's optimized driver, waveguide, and power efficiency technologies enable the LRAD 100X to provide several hours of clear, continuous communication from a single battery charge.

LRAD 100X MAG-HS Kit ..... LRAD 100X-BLK-MAG-HS

LRAD 450XL-RT

Mid-size Acoustic Hailing Device with Remote Operation

Utilizes technology developed and patented* by Genasys to provide the audio output of larger acoustic hailing devices almost twice its size and weight, while delivering the same outstanding vocal clarity inherent in all LRAD systems.

- Rugged, military tested construction
- Simple to operate: increased coverage with a single operator
- Scalable, lightweight & portable
- Low power requirements
- All-weather use

LRAD 450XL-RT ..... Call for Part Numbers

MVB3X

The MVB3X is a rapidly deployable, modular vehicle barrier designed to stop hostile vehicles without heavy equipment. Lightweight and tool-free, it provides certified anti-ram protection for temporary or dynamic security perimeters.

- Stops vehicles up to 7.5 tons at 30 mph
- One-person, tool-free deployment in minutes
- Modular units connect to span wide roadways
- Lightweight (approx. 53 lb per unit) and portable
- Performs on asphalt, gravel, sand, or uneven ground
- Certified to ASTM, IWA-14, and PAS 68 standards

MVB3X ..... Call for Part Numbers

ROLOGARD® K2900

- Sectional modular barrier design
- Variable width configurations
- Ultra-fast assembly and deployment
- Easy mid-string disassembly
- Galvanized steel construction
- Lightweight and rackable design
- Integrated signage capability
- LED lighting system
- Cabled barrier connections
- Portable hostile vehicle mitigation (HVM) solution
- All-surface / all-season capable
- Rapid deployment for crowd and infrastructure protection

Rologard® K2900 ..... Call for Part Numbers

SHARK SPIKE

The Shark Robotics SHARK SPIKE is a remotely operated, reusable spike strip that enables law enforcement to safely and rapidly immobilize fleeing vehicles from a distance, reducing officer risk during high-speed interventions and checkpoint operations.

- Remote deployment with up to ~300 m control range
- Rapid spike deployment in ~2.5 seconds
- Adjustable strip length (approx. 2–4.2 m) for varying road widths
- Up to ~400 deployments per battery with ~10-day standby
- Rugged, weather-resistant design (IP55) built for harsh conditions

Shark Spike ..... Call for Part Numbers

REVOLUTION TRAFFIC CONES

Slim Body Cones:

JBC™ Revolution Series Cones are available in a sleek, slim body design. The thin body profile of these cones allows for easier handling and storage. These injection-molded traffic cones can stand up to any weather and are great for high-wind conditions. An indented handle at the top allows for the cones to easily be picked up and stacked. Slim Body Cones are available with and without collars.

Colored Cones:

JBC™ Revolution Series Cones are available in lime green, dark green, yellow, red, white, sky blue, navy blue and pink. Colored cones are perfect for use in parking zones, sports and other recreational uses. Colored cones are available in either 18-inch or 28-inch, with or without reflective collars. All colored cones are MUTCD and NCHRP-350 compliant products.

Slim Body Cones 28" Wide Body	Call for Part Numbers

MESSAGE SIGN CAMERA SYSTEMS

The Wanco Message Sign Camera Systems add video monitoring and remote-access capability to Wanco message signs. The system provides live video monitoring and allows remote control of both the camera and the sign. Monitor traffic, change the message displayed on the sign, and control the day/night pan-tilt-zoom camera using your computer's web browser.

- Monitor work zones and traffic conditions
- Remote message and system control
- NTCIP compliant
- 4G cellular connectivity with GPS and radar support
- Real-time video access with PTZ camera

Message Sign Camera Systems	WAN-SIG-CAM

SMART® 12 - RADAR SPEED TRAILER

KUSTOM SIGNALS, INC.

- Kustom Signals directional K-band radar
- MUTCD compliant speed limit sign with interchangeable numbers from 5 to 75
- 12" high intensity Amber LED display
- Secure battery enclosure
- Flashing digits overspeed violator alert
- Optional traffic statistics with SMARTstat™ analysis software
- Optional red/blue, blue/blue, or white/white overspeed violator alerts

Smart 12 Radar Trailer ..... KUS SMART 12

SMART® 800/850 - RADAR TRAILER

Designed for maximum visibility, the 18" full matrix, high intensity LED display is visible up to 1,250 feet. Built to withstand the elements, the SMART 800 and 850 include a storage box for speed signs, equipment and batteries.

- Kustom Signals directional radar
- 18" high intensity LED display
- Violator alert with flashing LEDs
- Speed only displayed when target is in radar beam

Smart 800/850 Radar Trailer ..... KUS 5004

VARIABLE MESSAGE SIGNS: VMS II/HT

Designed for static and dynamic messages, VMS trailers can be quickly and easily put into place. Amber LED lights provide outstanding visibility.

- Hydraulic sign lift
- Up to 13 days run time with 2 deep cycle batteries
- Extend run time with additional batteries & solar options
- 4x 2-ton screw leveling jacks
- Removable tongue and removable 2" ball hitch

VMS II/HT Trailer ..... KUS SMART VMS II/HT

MINI MATRIX MESSAGE SIGNS

The Wanco Mini Matrix Message Sign is a towable compact variable message sign with a full-matrix LED display for text, symbols, and graphics, ideal for traffic safety, emergency response, and event messaging. It's about 30% smaller and more maneuverable than full-size signs yet delivers high-visibility messages in varied applications.

- Full-matrix bright LED display for text, graphics, and symbols
- Easy onboard programming without a laptop
- 360° rotatable display for optimal positioning
- Towable trailer under 2000 lb with standard 2" ball hitch
- Durable powder-coat finish and low power consumption

Mini Matrix Message Signs ..... Call for Part Numbers

METRO SIGNS FOR PUBLIC SAFETY

The Wanco Metro Sign for Public Safety is a compact, towable full-matrix LED message sign designed for tight urban environments, delivering high-visibility text and graphics with fast, one-person deployment.

- Full-matrix LED display for text and graphics
- Compact, lightweight trailer for urban use
- Touchscreen controller with onboard programming
- 360° rotating, height-adjustable display
- Battery-powered with solar charging

Metro Signs for Public Safety ..... WVTMM

TIER 4 FINAL MOBILE GENERATORS

Wanco WSP-Series Mobile Generators provide a complete rental-ready package built for construction, energy, telecom and industrial markets. Every model features a digital controller and robust construction for dependable performance. These are durable, reliable power systems you can count on — and their environmental features also help protect your work site. Every model is available skid-mounted or on a trailer.

- Robust rental-grade construction
- Heavy-duty, 4-cycle, EPA-certified Tier 4 Final diesel engine
- Large fuel tanks for maximum run time
- Oversized alternator with PMG for 300% motor starting capacity
- Sound attenuation for significant noise reduction

Tier 4 Final Mobile Generators	Call for Part Numbers

MINI SOLAR INTEGRATOR TRAILER

The Wanco Mini Integrator Trailer is a compact version of our full-size integrator trailers, providing the same robust and dependable platform for your gear. This versatile system lets you combine cameras, lights, recording devices, audio systems, communications, RF radios and more — anything needed to keep your job site secure. System power is supplied by batteries, which are charged automatically by the solar-based charging system.

- Easy Integration
- Built to last
- Power efficient

Mini Solar Integrator Trailer	Call for Part Numbers

POLE MOUNT RADAR-SPEED SIGNS

Wanco Pole Mount Radar-Speed Signs show vehicle speed and warn motorists to slow down by flashing their excessive speed.

- Configurable settings
- Choice of sizes and mounting options
- Battery or AC powered
- Optional 365-day timer

Pole Mount Radar-Speed Signs	Call for Part Numbers

DIRECTIONAL TALON RADAR SERIES

Built for performance and durability, the Directional Talon delivers reliable speed enforcement with solid-state Doppler radar. DSP technology identifies signals and reduces false readings by organizing targets by size and speed.

- Corded removable handle
- Target speed lock
- Flexible operation (handheld or dash-mount)

Talon Radar Series, Stationary	KUS 1670
Talon Radar Series, Moving	KUS 1671

2025 RANGER XP 1000 NORTHSTAR

The Polaris Ranger Crew XP 1000 NorthStar Premium Patrol Package is a fully enclosed, six-passenger utility vehicle built for law enforcement operations in any climate. It combines factory HVAC comfort with integrated emergency lighting, siren/PA, and patrol-ready accessories for rapid response, perimeter security, and off-road patrol missions.

- Sealed factory cab with heat and air conditioning
- Seating for up to six officers
- Premium emergency light bar and vehicle lighting package
- 100W siren and public address system
- 82-HP ProStar engine with on-demand AWD
- Custom law enforcement graphics
- Designed for patrol, crowd control, and off-road response

SANI DEFENX X

The Sani Defenx X is an automated equipment sanitization system that helps reduce bacteria, viruses, and odors on athletic gear, PPE, and other shared equipment. Featuring a waterless design, ozone-based treatment technology, adjustable storage, and easy mobility, it provides an efficient solution for maintaining cleaner equipment in educational, athletic, and public safety environments.

- Automated sanitization and deodorization cycle
- Ozone-based technology helps reduce bacteria, viruses, and odors
- Waterless operation with no plumbing required
- Accommodates athletic gear, PPE, uniforms, and equipment
- Adjustable shelving for flexible storage
- Mobile design with caster wheels
- Simple operation and low maintenance
- Ideal for schools, athletic facilities, and public safety organizations

Sani Defenx X ..... Call for Part Numbers

FLEXWIPES® DISINFECTANT WIPES

FlexWipes® Disinfectant Wipes provide fast, one-step cleaning and disinfection for schools, healthcare facilities, gyms, and other high-traffic environments. The EPA-registered, bleach-free formula kills a broad range of pathogens while helping maintain clean, sanitary surfaces.

- Cleans, disinfects, and deodorizes in one step
- EPA-registered to kill over 40 pathogens
- Eliminates 99.9% of bacteria in as little as 15 seconds
- Safe for most hard, non-porous surfaces
- Durable, heavy-duty wipes resist tearing during use
- Bleach- and phenol-free formula
- 125 wipes per canister; 6 canisters per case
- Made in the USA

FlexWipes® Disinfectant Wipes ..... NTC 80125

SIROCCO 300 BATTERY PRO-PACK

A battery powered LED lighting balloon, suitable for mobile operations.

- Lighted area: 1,017 m² – 10,946 ft²
- Maximum lumen: 20,500 lm
- Maximum power: 160 W
- Light efficiency: 345 lux – 32 fc
- Balloon weight: 2.3 kg – 5.0 lbs

Sirocco 300 Battery Pro-Pack SIR0314

NOMAD® 360 SCENE LIGHT

The FoxFury Nomad® 360 Scene Light is a cordless, battery-powered LED scene light delivering up to 8,800 lumens of 360° illumination. With built-in tripod legs and an 8.5-ft telescoping mast, it provides hands-free, all-weather lighting for emergency, tactical, and disaster response operations.

- Cordless, rechargeable LED scene light up to 8,800 lumens
- 360° scene, 120° flood, and 12° spotlight modes
- High-CRI (90) output for accurate color rendering
- 8.5-ft telescoping mast with built-in tripod; deploys in under 20 seconds
- Multiple brightness modes with up to 24-hour runtime
- Waterproof, impact-resistant, and NFPA fire-resistant construction

Nomad 360 Scene Light 200-900

STINGER® 2020 - RECHARGEABLE LED FLASHLIGHT

The Stinger 2020 is the next evolution in high-performance flashlights and produces 2,000 lumens. Its aluminum alloy body with an anti-roll design is ergonomically shaped for a sure grip. It features dual power switches and an intuitive mode selector switch for ease of use.

- Features independently functioning head and tail switches
- Uses two (2) SL-B26® protected Li-Ion USB rechargeable battery packs
- Corrosion-resistant, gasket-sealed BOROFLOAT® glass lens
- High, medium, low, and strobe modes

Stinger 2020, Black ..... STR 78100

PROTAC® 2.0 HP

The Streamlight ProTac® 2.0 HP is a rechargeable tactical flashlight delivering 2,000 lumens and 85,000 candela with a 583-meter beam. Featuring TEN-TAP® programmable modes, a USB-C rechargeable battery, and IP67 durability, it's built for law enforcement and professional use.

PROTAC 2.0 HP 89023

AURA™ PARTICULATE RESPIRATOR 9205+

3M™ Aura™ 9205+ N95 Respirator delivers at least 95% filtration efficiency against non-oil-based particles. Its lightweight, three-panel design provides a comfortable fit, while 3M™ Advanced Electret Media enhances filtration and breathability. Soft inner materials and an adjustable nose clip help improve comfort and seal.

- NIOSH-approved N95 respirator (95% filtration efficiency)
- Ideal for sanding, cutting, woodworking, insulation, yard work, and dust exposure
- Advanced electrostatic media for effective filtration and easier breathing
- 3-panel design fits a wide range of face shapes and allows natural movement
- Adjustable nose clip and cushioning nose foam for comfort and a secure seal
- Helps reduce eyewear fogging and is compatible with most safety glasses
- Individually packaged, flat-fold design for easy storage and portability
- Made in the USA with globally sourced materials; latex-free components

3M™ Aura™ Particulate Respirator 9205+ ..... Call for Part Numbers

TYVEK® 400

Tyvek® 400 garments are composed of flash spun high density polyethylene which creates a unique, nonwoven material available only from DuPont. Tyvek® 400 provides an ideal balance of protection, durability and comfort of any limited use fabric technology. Tyvek® 400 fabric offers an inherent barrier against particles (down to 1.0 micron in size). Protection is built into the fabric itself; there are no films or laminates to abrade or wear away. Tyvek® 400 fabric's durability advantage over microporous film fabrics delivers consistently better barrier, even after wear and abrasion. Applications include: lead and asbestos abatement/remediation, general maintenance/operations, spray painting, general clean-up.

- Type 5/6 chemical protection
- Attached respirator-fit hood with storm flap
- Elastic wrists, ankles, and waist for a secure fit
- Latex-free construction
- Extended zipper for easier donning and added coverage
- Comfort-fit design for improved mobility and durability

DuPont™ Tyvek® 400 ..... TY127S WH
